

<b>Job title</b>	<i>Salesforce Lightning Engineer</i>
<b>Reports to</b>	<i>CEO</i>

### Job purpose

The main purpose is to analyze company processes, developing CRM workflows and custom solutions for specific business in a variety of industries on the Salesforce.com platform.

### Duties and responsibilities

- Work with the team to analyze business requirements, translating those requirements in to customized solutions using the Salesforce platform.
- Design and build high-performance, reusable, and reliable Apex code with best practices
- Ensure the best possible quality of the application
- Take ownership of project work and developing client relationships
- Assist in the estimation of work effort and set a realistic schedule for development.
- Identify bugs and align with requirements during debugging
- Write test classes for the class that you develop and ensure more than 80% code coverage
- Test bug fixes to make sure they work as per requirements, then deploy them to production
- Assists client teams in supporting the live application and perform handoff and knowledge transfer activities, positioning our clients for long term success.

### Qualifications

- 2+ years of experience with web application development including JavaScript, CSS, or HTML5.
- 1+ year if experience with Salesforce.com APEX
- 6+ months of experience with customization on the Salesforce Lightning platform which should include: Lightning Components using the Lightning Design System framework, Apex, Apex data loader, and declarative platform tools. (Process Builder, Visual Workflow, Lightning App Builder, etc.)
- Experience working with an editor such as Mavensmate or Eclipse for force.com
- Ability to communicate with customers and provide consultation on Salesforce solutions
- Good problem-solving skills and ability to give optimal solutions
- Hands-on experience in administration setup, e.g., managing users, security controls, and data as well as creating roles, profiles, and reports.
- Experience in designing custom objects, custom fields, picklists, page layouts, workflow, approval processes, validation rules, custom tabs, reports, Visualforce pages, dashboards, and email generation according to application requirements
- Education: BEng (IT, CE, CS, or EC), BSc, MSc (CS), BCA, or MCA
- Certification: Any Salesforce certification would be a plus
- Ability to self-organize work
- Ability to work as a part of the team

### Working conditions

This position is hourly, remote position. Will require ability to work independently
