

Quantum Entropy Integrator

Transforming Quantum Security Solutions

Integrating highest level of Quantum Entropy Safe Cyber Security to protect your data.

CAGE CODE

8BFU9

DUNS NUMBER

052847390

Areas of Expertise

Cloud	Mobile
On prem	Applications
AWS	Edge computing
Azure	Quantum SDKs
Google cloud	QRNG
Local Data Centers	Entropy
VPN	Legacy Systems
SSL	Open
Web	Architecture
Web Server

Bright Apps LLC Quantum Entropy Integrator is a software solution that integrates with server stacks ensuring the highest level of security throughout your networked system to prevent future computing threats. Creating the highest level of data security through the utilization of Quantum Entropy.

Executive Statement

Mission

Our mission at Bright Apps LLC is to develop innovative custom, end-to-end global technology solutions, while providing world class concierge service.

Vision

Our vision is to create systems that change the way the world does business through expertise and innovation.

Quantum Tool Box

Key Generation

Through the process of observing quantum mechanics and the use of our Quantum Entropy Integrator, we provide the highest quality and unpredictability of public and symmetric cryptographic keys to protect against attackers. Quantum Entropy Integrator ensures your entire network does not suffer from "Entropy Depletion" which creates vulnerabilities throughout the network.

Enhanced Encryption

Bright Apps has created the next generation quantum entropy encryption solutions that provides the most advanced cutting-edge security for your network. Bright Apps Quantum Entropy Integrator helps protect the most sensitive of data in transit and at rest. Ensuring the highest level of cybersecurity, protecting you and your clients' data.

Entropy Integration

Bright Apps Integrator will allow Quantum entropy to be integrated into both legacy or new systems.

- Ensuring entropy throughout the network and alert and fix where entropy is low.
- Data is securely protected both in transit and at rest.
- Protects data in all networked devices keeping all your systems secure.

Core Competencies / Differentiators

Core Competencies

- Frontend and Backend application servers
- Open SSL/Wolf Libraries
- Programming Languages SDK Libraries

Differentiators

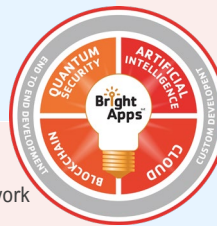

- Monitors entropy throughout the network
- Protects against Brut Force attacks
- Integrates with any software language
- Best for securing quantum entropy connections in your cloud

Differentiators

- Integrator for legacy and new systems
- Safest encryption for your data
- Best for securing quantum entropy connections on-prem

Core Competencies

- Full Linux servers
- Protects data in all networked devices
- Application Stack
- Protecting against future Quantum Computing threats

NAICS Codes

- 541511 Custom Computer Programming Services
- 541512 Computer Systems Design Services
- 541519 Other Computer Related Services
- 541715 Research & Development in the Physical Engineering & Life Sciences
- 541330 Engineering Services
- 541611 Administrative & General Management Consulting Services
- 541618 Other Management Consulting Services
- 541690 Other Scientific & Technical Consulting Services
- 541990 All Other Professional, Scientific, & Technical Services
- 519130 Internet Publishing, Broadcasting, & Web Search Portals

Value Proposition

Quantum Entropy Integration services integrating highest level of Quantum Safe Cyber Security to protect your data in the cloud, OnPrem and the tactical edge.
